

SAWIS

**Smart Automation
Weighbridge Management
System**

Welcome to the Future of Weighment Management

SAWIS (Smart Automated Weighbridge Information System) revolutionizes weighment management with advanced technology. Being operational since 20+ years, this unmanned system ensures reliable and efficient weighment operations, cutting costs and preventing errors. Integrated components like Barcode/RFID readers, Boom Barrier, IP Camera, and more provide comprehensive control and real-time monitoring from the control room.

UNMANNED AND COMPUTERIZED

Experience a fully automated weighment process, eliminating human errors and ensuring precision

COST-EFFECTIVE

SAWIS offers significant cost savings for companies through streamlined operations and reduced labor requirements

VEHICLE IDENTIFICATION SYSTEM

SAWIS seamlessly identifies vehicles using RFID tags/barcodes. It captures the gross & tare weight

INTEGRATION MADE EASY

Seamlessly integrate Barcode or RFID Card Readers, Boom Barriers, Traffic Lights, IP Cameras, Speakers, and Control Boxes

REAL-TIME MONITORING

Gain complete visibility into every weighment action with our sophisticated control room setup

PREVENT TAMPERING

Our system safeguards against any unauthorized interference, ensuring the integrity of weighment operations

AUDIT TRAILS

Software is equipped with audit-trails functionality for tracking and control

STATISTICS & REPORTING

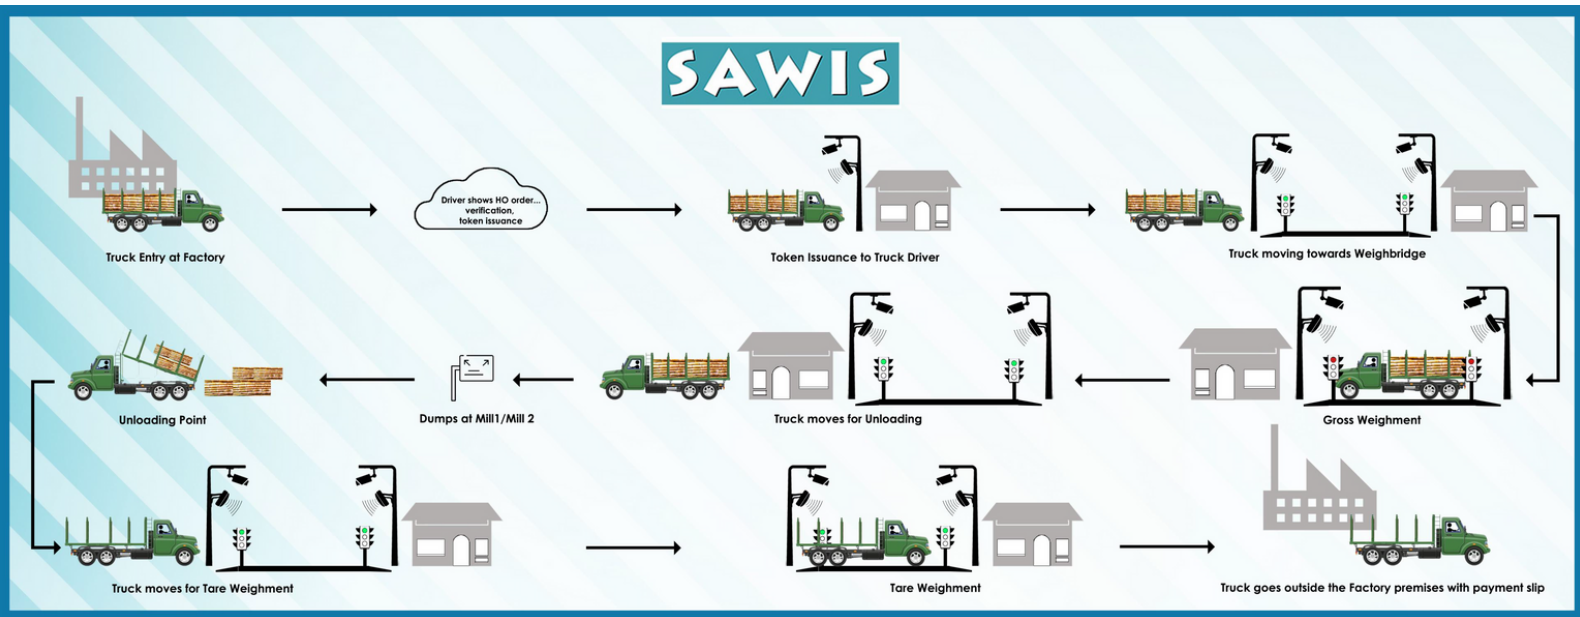

With inbuilt MIS functionality, reports can be generated and can be tailor-made

VEHICLE WEIGHMENT INTELLIGENCE

SAWIS has inbuilt capabilities to alert on gross weight/tare weight basing on previous readings
